The National Diabetes Prevention Program (National DPP) Coverage Toolkit helps payers and those making the case for coverage fully understand the program, navigate the steps needed to cover it, and access detailed information and resources. The Toolkit is organized according to payer type: Medicaid agencies, Medicaid managed care organizations (MCOs), commercial payers (health plans and employers), and Medicare.

If you require this document in an alternative format, such as large print or a colored background, please email publications@chronicdisease.org. Alternate formats can be made available within two weeks of a request.

“I would not be able to have a conversation with our Medicaid office without [the Coverage Toolkit].”

Visit the Cost and Value, the Medicaid Case for Coverage, and Commercial Case for Coverage pages for resources to help public and private payers understand the value of covering the National DPP lifestyle change program.

The National Association of Chronic Disease Directors (NACDD) and Leavitt Partners, developed the CoverageToolkit.org with funding from the Centers for Disease Control and Prevention (CDC), Division of Diabetes Translation in 2017. The Toolkit is part of a demonstration project to develop Medicaid coverage models for the National DPP lifestyle change program.

This publication was supported by Cooperative Agreement Number 5NU38OT000225-04 funded by CDC. Its contents are solely the responsibility of the author and do not necessarily represent the official views of CDC or the Department of Health and Human Services.
